

Read Up a Storm!

A Community Read on Climate Disruption and Water

Possible questions for your discussion:

Do you feel connected to the environment? How?

Does climate disruption matter to you? To Plymouth?

What can Plymouth do to be more ecologically sustainable?

What makes you hopeful about addressing climate change?

If we used all our technical and scientific expertise and applied our growing knowledge and understanding about the interconnectedness of all life on earth, what could the world in 2030 possibly look like?

We know from history that in times of crisis, creativity and innovation are required for achieving stability. With creativity and innovation, comes opportunity. Are there opportunities that might be available to us as a community in response to the climate crisis?

There is a Māori proverb, Hoki whakamuri kia anga whakamua, that means "walk backwards into the future". What could this moment, with its current challenges, be asking of us?

Was there a time in human history when we better understood the interconnectedness of all life on earth and lived our lives accordingly?

We also welcome your own questions and discussion methods. Whether or not you want one of us to join your discussion, we'd love to know what your thoughts on the book or books you chose to read.
