

Summer 2024 Sustainability Series

JUNE 5TH 7-8PM

SOLAR PANELS: RUN YOUR HOME ON SUNSHINE

Hear Solar Designer Phil Angell on how solar panels work, assessing your roof's suitability, what's entailed in installation, leasing vs purchasing, and community solar. He will also cover capacity planning for electric car and heat pump, available incentives, and finding a contractor. Light refreshments.

JUNE 29TH 10AM-3PM

ELECTRIC CAR SHOW & EV WORKSHOP

See a display of cars by members of the New England Electric Auto Association and learn about their ownership experience. Check out cutting edge EVs from local dealerships and new EVs from the Town of Plymouth's fleet. From 1pm-2pm, attend an EV workshop in the Fehlow Room to learn about purchasing an EV, including state and federal incentives as well as local charging station availability. Light refreshments.

JULY 10TH 7PM-8PM

HEAT PUMPS: ENERGY EFFICIENT HEATING AND COOLING

Loie Hayes, Green Energy Consumer Alliance's Energy Efficiency Coordinator discusses how heat pumps work, performance during very cold weather, various configuration options, available state and federal incentives and finding a contractor. Light refreshments.
